

# Wadaboo

Purchasing platform with reverse auction system and collaborative purchasing pool.

We seek to organize and streamline the purchasing processes of many companies companies in Latin America, achieving lower costs in each operation.

In Latin America, there are 15 million SMEs, which carry out transactions worth several million dollars every day.

Our target market is Latin America, where SMEs account for 98% of the total business map. Business map.

# Timeline

Wadaboo invests in marketing Chile

Q2 2022 - Q3 2022

We are trying to open in other exchanges

Wadaboo opens operations in Colombia and Brazil

Q4 2022 - Q1 2023

Wadaboo opens operations in Mexico, Spain and USA

We invest heavily in marketing and advertising in these countries.

# Current problems I

- Disorganized purchases, without planning.
- Limited suppliers, which means that purchases are not 100% effective.
- Private processes are not transparent.

# Current problems II

- Purchases without feedback at the right time, so it does not allow the possibility of renegotiation.
- Employees with negotiation skills, 100% dedicated to the purchasing task.
- Entrepreneurs and SMEs without purchasing power (lack of liquidity). They increase costs without being able to transfer that value to the sale price, losing profit.

**Wadaboo** is an automated platform for:

- **Transparency** of the entire purchasing process for entrepreneurs and SMEs.
  - **Organize and automate** several products from different categories in a single process.
  - Access to a **whole** ecosystem of suppliers from a wide variety of items.
  - **Automatically** renegotiate the price of each product without having to wait for the purchase.
- 

**Wadaboo** is an automated platform for :

- **Suppliers and buyers** know at the very moment the auction ends, who won and why. (feedback)
  - There would **no longer** have to be qualified personnel only dedicated to the purchasing task.
  - To reduce the costs of the buyers, no matter how small the company is, being able to form **collaborative purchasing** pools and thus have access to products for lower prices.
- 

# How it work?

Buyer issues a  
purchase order

Suppliers  
receive a  
notification  
and decide  
participate

The best bid  
wins

# 15.000.000

From active companies that are SMEs in Latin America and that carry out many transactions every day.

# 15%-20%

SAVE MONEY

# ¿ What is Wadaboo's profit?

**Only suppliers are charged. Buyers are not charge at all**
